

CHAPTER 17
AIRPORT OVERLAY ZONE, AOZ

17.7

TRANSITIONAL ZONES

Transitional zones are hereby established as the area beneath the transitional surfaces. The surfaces extend outward and upward to 90 degree angles to the runway centerline and the runway centerline extended, at a slope of 7 feet horizontally for each foot vertically from the sides of the primary and approach surfaces to where they intersect the horizontal and conical surfaces. Transitional zones for these portions of the precision approach zones which project through and beyond the limits of the conical surface extend a distance of 5,000 feet measured horizontally from the edge of the approach zones and at a 90 degree angle to the extended runway centerline.
